## Smarter Shopify delivery rates, powered by postal codes

Shipping rates management · Zone control · Customization and compatibility · Localization · Support

### Delivery zone control

Setup delivery zones that reflect your actual coverage - so you never undercharge or accept orders outside your service area.

### Flexible rate control

Set delivery rates that reflect your actual delivery zones - from broad regions to precise local coverage.

### Faster migrations

Move from spreadsheets or other tools with ease - import and export zones, rates, and postal codes via CSV.

### Smarter postal code matching

Use exact, partial, or advanced post code logic to support both simple and complex delivery setups.

### AI-assisted onboarding

Setup faster with Zapiet AI - build your configuration and catch overlaps or gaps before they impact orders.

### No Carrier Service API required

Setup postal code-based delivery rates without needing Shopify's Carrier Service API.

## Shipping rates management

- Fallback delivery rate, so no customer hits a dead end at checkout
- Detailed rate logs for complete visibility into how rates are calculated
- Partial and exact code matching for precise control over coverage
- Price and weight-based rates that adjust to cart value or weight

## Worldwide

**Global postal code support**  
wherever Shopify operates, so does the app

### Our pricing

**\$14.99** /month

### Everything you need to get started and scale your business

- 1-100 store locations
- Advanced postal code matching
- Compatible with all Shopify plans
- Weight/price based rules
- Translatable rates
- Chat, email and phone support
