Trusted by

Everything you need to run and grow your food business on Shopify

Food ordering · Live order management · Menu & seasonal scheduling · Dine-in · Table reservations · Kitchen tracking

Stop losing money on deliveries

Custom delivery fees allow you to cover your costs accurately by charging based on distance or the total order value

Know which dishes make you money

Comprehensive reporting shows exactly what your bestsellers are so you can optimize your menus for higher profitability

Order status & reviews widget

Cuts down on customer support calls and uses social proof to turn first time buyers into regulars

Fill your quiet Tuesdays

Date-based discounts give you an easy way to run targeted promotions and get more orders on their traditionally slow days or seasonal holidays

Dietary restrictions & allergens

Helps you safely cater to a wider audience and build loyalty with customers who have specific needs

Add a drink to every order

Product bundles make it easy to upsell items like drinks and sides to increase your average order value

Give customers a seamless ordering experience

- Turn menu browsing into orders in seconds
- Switch between pickup and delivery at any time
- See times, fees, and availability before checkout
- Works on any device, directly inside your Shopify store

3x Fewer steps at checkout
Optimized to drive revenue

Our pricing

\$49.99/month

250 orders/mo included, then \$0.10/order.
No commission — every order is 100% yours.
