Built for
Merchants shipping fragile, bulky, heavy,
or premium products

Trusted by

Product-level rates control for every scenario

Shipping rates management · Customization and compatibility · Localization · Support

Product-based rate control

Set different rates for different products, so shipping and delivery pricing reflects what customers are actually ordering

Flexible rate logic

Build rules by products, collections, tags, variants, product types, and vendors to create more accurate and scalable pricing

Set a strong shipping foundation, then fine-tune

Apply a base rate to all orders, set custom rates for specific product groups, and use a default group to make sure nothing in your catalog slips through

Smarter handling for special items

Charge differently for fragile, bulky, heavy, or premium products without relying on one-size-fits-all rates

Extra fees made simple

Automatically add handling, packaging, or item-specific charges so your fulfillment costs are always covered

Translatable rates

Translate your rate names into multiple languages so customers see clear, localized shipping options that match the rest of your storefront experience

Shipping rates management

- Per-product rate control for individual products or variants
- Collection and vendor rules, plus product tags and more
- Price and weight-based rates set by order value or total weight
- Handling and packaging fees, with detailed rate logs

6

ways to target a rate

products, collections, tags, variants, product types, and vendors

Our pricing

\$14.99 /month
